

Serialization

Advanced Python Programming

—

Valerio Velardo - The Sound of AI

What's serialization?

*Convert a data structure into a text
or binary format to store it and
facilitate network transfer*

Serialization in Python

Serialization in Python

- Pickle
 - Python module that implements binary protocols for serializing and de-serializing Python object structures
 - + optimised
 - - can't be ported, not legible by humans

Serialization in Python

- Pickle
 - Python module that implements binary protocols for serializing and de-serializing Python object structures
 - + optimised
 - - can't be ported, not legible by humans
- Json, Yaml, csv, ...
 - Text files
 - + portable, legible by humans
 - - heavy

What serialization strategy should I use?

What serialization strategy should I use?

- A lot of data to store -> pickle

What serialization strategy should I use?

- A lot of data to store -> pickle
- Working with multiple programming languages -> Json, Yaml

What serialization strategy should I use?

- A lot of data to store -> pickle
- Working with multiple programming languages -> Json, Yaml
- Legibility is fundamental -> Json, Yaml
